## KODAK Lenses for Computer Viewing

# KODAK SoftWear™ Lenses – Supporting Intermediate and Near Vision Tasks

Spending long hours hunched in front of a computer does nothing for posture or eyesight. Computer-based projects or large amounts of detail work demand the use of a task-oriented lens – KODAK SoftWear Lenses.

KODAK SoftWear Lenses are digitally-created, full backside lenses, assisting the eyes for prolonged intermediate and near-viewing tasks.

## Incorporating Vision First Design™ Technology

KODAK SoftWear Lenses incorporate Vision First Design Technology into a full backside, task-oriented lens. This technology provides KODAK SoftWear Lenses with a smooth power progression and excellent binocular balance to ease patient adaptation and provide excellent visual performance.

## Easy To Order and Fit

KODAK SoftWear Lenses are as easy to order and to fit as KODAK Progressive Lenses. With a set computer monitor viewing distance of 24", KODAK SoftWear Lenses simplify lens dispensing without compromising visual performance.

## A Greater Level of Protection

Include a KODAK Anti-Reflective Lens Coating to reduce lens reflections and eyestrain. With several levels of protection, KODAK Anti-Reflective Lens Coatings offer an even greater level of vision protection.
